

General Lab Instructions (Apply Every Week)

☐ Submission Rules

- ☐ All lab work must be pushed to **GitHub** on the **same day** as the lab session.
- ☐ Use a **single repository** for the entire course.
- ☐ Repository naming format: web-dev-labs-<group-no>
- ☐ Folder structure
 - ☐ web-dev-lab-<group-no>
 - ☐ week-01
 - ☐ week-02
 - ☐ week-03

☐ Each Week Must Include

- ☐ index.html or/and any other relevant files)
- ☐ Screenshots (browser's screenshot)
 - ☐ Screenshots should be placed within the week folder
- ☐ [README.md](#) file explaining:
 - ☐ Objective
 - ☐ What was done
 - ☐ Challenges faced
 - ☐ Members participated
- ☐ All lab activities must be carefully and consistently documented, as you will be required to submit a concise report as part of **Assignment 01**.
- ☐ Each **Tuesday morning**, one member from **any** group will be selected **randomly** to present the work completed during the lab session.

Week 1: HTML Document Structure

Objective:

Reinforce HTML fundamentals by creating a structured, multi-page website that incorporates document structure, navigation, and multimedia elements.

Tasks:

- Create a properly structured HTML document using:
 - `<!DOCTYPE html>`, `<html>`, `<head>`, `<body>`
 - Include title and meta tags
- Add basic content:
 - Headings, paragraphs, and comments
- Develop multiple web pages:
 - Home, About, Contact pages and Link To External
- Implement navigation:
 - Internal links between the pages
 - External links to relevant websites
- Add multimedia:
 - Insert two images using the `<img>` tag, one from local and one from online(pick one from [Unsplash](#))
- Add contents that are organized into lists (either ordered or unordered list)

Deliverable:

A complete 4-page website (Home, About, Contact, Link To External) that includes:

- Proper HTML structure
- Functional navigation links
- Text content and images
